

Quality Filtration Made Simple

Gas Filter Elements

Liquid Filter Elements

Filtration Solutions

Offshore Exploration & Production

Gas Production, Transmission and Storage

Refinery & Petrochemical

Power Generation

in the Oil & Gas Industry

Company profile

"Jonell provides the highest quality filtration products with the best delivery time in the industry"

Since 1987 Jonell has focused on understanding the specific filtration/separation needs of each of our customers. We are the leading industrial designer and manufacturer of filter elements and filtration equipment. By using the most advanced technologies we produce and supply state of the art filtration products while maintaining industry leading deliveries. Our custom-designed solutions, applied as part of a comprehensive production strategy, have consistently proven to enhance maintenance operations while increasing operation efficiencies. To meet the most demanding oil & gas applications, Jonell's filter elements are available in a wide variety of materials, including: polyester, polypropylene, cotton, nylon, Teflon, metals, micro fiberglass, resin-bonded cellulose, and many more.

With decades of accumulated knowledge in replacement OEM filter cartridges, our experienced staff can quickly replace over 36000 OEM element part numbers, making us a single source supplier for your filtration/separation needs. Regardless of your application, Jonell's filtration/separation products and services can maintain and enhance your operational performance.

In the oil & gas industry, an efficient filtration/separation system is critical to the reliability and performance of the physical assets that produce, transport and process oil and gas, as well as their derivative and finished products. Optimizing the reliability of these filtration systems is essential in maximizing your operation performance.

Optimized filtration/separation systems will lead to:

- Increased Overall Process Performance
- Lower Maintenance Costs
- Decreased Down Time
- Improved Operating Efficiencies

Jonell EurAsia supports fast and accurate deliveries through a large warehouse in the Netherlands. From our expertise to our unparalleled response times, we pride ourselves in providing the very best customer service in the industry. We are truly committed to exceeding every facet of our customer's expectations.

Our products

Jonell has worked diligently to advance the economics of oil & gas filtration, creating a knowledge-based company with an industry leading staff of experts capable of delivering a variety of filtration/separation solutions to fit your specific maintenance and operation needs. Utilizing this experience, Jonell has succeeded in developing thousands of high quality filter elements covering a wide variety of filtration applications.

Air Filter Elements

- Pleated Rounds
- Pleated Panels

Gas Filter Elements

- Pleated Media Filters
- Depth Style Filters
- High Temperature Filters
- Sewn End Filters

Gas Coalescing Filter Elements

- Pleated Coalescing Filters
- Depth Style Coalescing Filters
- Synthetic Coalescing Filters
- Multi-stage Coalescers

Liquid Filter Elements

- Pleated Media Filters
- Hydraulic Filters
- Sock Filters
- String Wound Filters
- Melt Blown Filters
- Resin Bonded Filters
- Bag Style Filters
- Activated Carbon Filters
- Coreless Filters

Two Phase Liquid Separation

- Coalescing Filters
- Separation Filters
- Liquid Absorption Filters
- Full Diameter Coalescing Wafer Packs

Filter Vessel Internals

- Wire Mesh Mist Eliminators
- Vane Style Mist Eliminators
- Filter Element Support Risers
- Mesh - Vane Assemblies

Filtration Process Optimization

- Feed Consultation
- Product Customization
- Filter Element Dissection Analysis
- Problem Shooting

Applications

Jonell's filtration products are applied in numerous industries worldwide.

Gas Processing & Transmission

- Glycol Dehydration
- Compressor Protection
- Amine & Glycol Purification
- Condensate Dewatering
- Flowmeter and Meter Runs
- Other Applications

Power Generation

- Hydraulic and Lubrication Fluids
- Clean Fuel Gas
- Water Treatment Systems
- Turbine and Generator Protection

Offshore Exploration & Production

- Injection Water
- Produced Water
- Compressor Protection
- Turbine Protection
- Other Applications
(Gas Sweetening Systems,
Gas Hydration, etc.).

Refinery/Petrochemical

- Catalyst Protection
- Ultra Low NOx Burner Protection
- Activated Carbon Units
- Waste Water
- Final Products Filtration

Service

As a specialist in the oil & gas filtration, customer service is our specialty. Our services include:

- Product Customization
- Process Optimization
- Extensive Replacement Program
- 24/7 Emergency Services
- Large Product Stock
- Delivery Within 3 Days
- DDP Delivery
- Packaging and Labelling
According to Customers Wishes
- E-business Capabilities
 - Product Information
 - Electronic Ordering
 - Tracking and Tracing
 - OCI
 - Direct Connection with Customer ERP System

Engineering

The ultimate purpose of filtration is to protect equipment or to purify a product for sale. Our engineering department specializes in providing filtration solutions and has years of experience in developing, calculating and producing filters and filtration vessels according to the requirements of our customer's applications. All our products can be produced and tested in compliance with all applicable standards and regulations.

Jonell EurAsia supports fast and accurate deliveries through a large warehouse in the Netherlands. From our expertise to our unparalleled response times, we pride ourselves in providing the very best customer service in the industry. We are truly committed to exceeding every facet of our customer's expectations.
